How a check will work

1 Send the advert

A link, a screenshot or a forwarded chat message. Use any phone browser or a Telegram bot.

2 Three checks run at once

Price. Is the offer too cheap to deliver for those dates?

Seller. Which registered company is behind this page or phone number? Does it hold a travel licence? Is there an official warning?

Across borders. The same check in Malaysia and Indonesia.

3 Read the answer

Safe Risky Do not pay yet

Safe, risky or do not pay yet, with the evidence for each flag. The named agency has a right of reply.

Every answer lists its reasons. A seller is called risky, never a fraud.
